Guidelines for Sod

Dormancy Application: 32 ounces per acre *Soil Solution* (*Nutrilase RC*): This application can be made in the late Fall, Winter or early Spring, before turf starts to green up. May also be applied on green turf but not as beneficial for the specific season of application.

Designed to enhance digestion and breakdown of thatch.

Initial Planting Seed Treatment: Utilize where enhanced emergence and survival are desired. Apply *Seed Coat* (formerly *Grow Coat*) @ 2 Oz (dry weight) per planted acre of seed.

Designed to stimulate micro-flora in the rhizosphere immediately adjacent to seed, and enhance seedling root development and stand establishment.

Early Spring Application: 24 ounces per acre of *Percplus* (*Plant Power*) broadcast

Designed to enhance root development, early growth, and better response to applied fertilizers

Late Spring Application: *Nutri-K* @ 32 Oz/acre applied with *Percplus* (*Plant Power*) @ 16 Oz/acre and *Iron Plus* @ 8 oz/acre.

Mixing: Always dilute *Nutri K* in water first, and follow with other ingredients in listed order to avoid excessive foaming.

Designed to enhance stolon branching for thickening of turf, build tolerance to disease and aid in response to applied nitrogen

Mid-Summer Application: 32 ounces per acre of *Nutri-K* applied with 8 ounces of *Percplus* (*Plant Power*) and 8 ounces of *Iron Plus*. NOTE mixing instructions above!

Designed to maintain turf growth and metabolism

Pre-Harvest of Sod: Apply 16 ounces of *Percplus* (*Plant Power*), preferably two to three weeks before harvest of sod.

Designed to build fresh root development to hold sod together better at harvest and maintain color

Post-Harvest: Apply *Soil Solution* (*Nutrilase RC*) @ 32 Oz/acre to the soil to enhance grow out after harvest.

For sod, this application is designed to enhance growth of left over strips of turf.

These **DeltAg Guidelines** have been utilized to enhance overall crop performance and are not intended to be utilized as a replacement for basic and customary fertilizer applications.
