# Guidelines for Cabbage

**Preplant Soil Application:** 24 ounces per acre *Soil Solution (Nitrilease RC)*: This application should be made in the Fall, and incorporated, or up to planting in the Spring. For No-till or over a growing crop, increase rate to 32 ounces per acre.

*Designed to enhance digestion of crop residue and increase microbial activity.*

**Hopper Box Seed Treatment:** Utilize where enhanced emergence and survival are desired. Apply *Seed Coat (formerly Grow Coat)* @ 2 Oz (dry weight) per planted acre of seed.

*Designed to stimulate micro-flora in the rhizosphere immediately adjacent to seed, and enhance seedling root development and stand establishment.*

**Transplant Water:** Apply *Percplus (Plant Power)* @ 8 Oz/acre in with total water volume.

*This application will reduce Lag Phase in root establishment after transplant.*

**Planting:** Apply *Percplus (Plant Power)* @ 16 Oz, *Sulfur Plus* @ 32 Oz, and *Boron Plus* @ 20 Oz/acre in a minimum 10 gallon total volume, knifed into side of seed bed (6" X 6"). *Note:* This application can replace the Transplant water application. The addition of a quality PGR has been found to be very beneficial in this application (Ex. Stimulate, Early Harvest, etc.)

*This is a Starter Program that will enhance and hasten final crop maturity.*

**Seedling Foliar:** After initial shock of transplant (4 to 5 days);

Apply 16 ounces *Percplus (Plant Power)*, 8 ounces *Zinc Plus*, and 4 ounces *Boron Plus*. Apply twice on seven day intervals.

**Note:** *Zinc Plus* will provide additional Zinc and Sulfur.

*This application is designed to build tolerance to disease and enhance final yield.*

**Prior to Maturity: Multiple Applications;** Foliar apply 32 ounces *Nutri K*, 4 ounces of *Boron Plus*, and 8 ounces *Percplus (Plant Power)* on weekly intervals for three to four applications.

**Mixing:** Always dilute *Nutri K* in water first, and follow with other ingredients in listed order to avoid excessive foaming.

**NOTE:** Add *Calcium Plus* @ 32 ounces to this combination in the final application just prior to harvest.

*This application will enhance crop quality and yield.*

*These DeltAg Guidelines have been utilized to enhance overall crop performance and are not intended to be utilized as a replacement for basic and customary fertilizer applications.*
