Guidelines for Carrots

Soil Application: 24 ounces per acre **Soil Solution (Nutralase RC):** This application may be made in the Fall, and incorporated, or surface applied during the growing season. For soil surface applications increase rate to 32 ounces per acre.

Designed to increase soil microbial activity and enhance digestion of crop residue.

Seed Treatment:

Hopper Box Powder: Utilize where enhanced emergence and survival are desired.

Apply **Seed Coat** (formerly Grow Coat) @ 2 Oz (dry weight) per planted acre of seed.

Designed to stimulate micro-flora in the rhizosphere immediately adjacent to seed, and enhance seedling root development and stand establishment

In-Furrow: Option A: 8 ounces per acre of **Percplus (Plant Power)**

Option B: If shallow seeding and watered up: Apply **Percplus (Plant Power)** @ 24 oz/acre broadcast after planting and before watering for germination.

Designed to enhance root development, early growth, and build crop tolerance to early season stress

Seedling Foliar: Make an initial application of **Percplus (Plant Power)** @ 24 ounces broadcast, and **Zinc Plus** @ 16 ounces, beginning at two to three leaf seedlings. This application may be banded at half rate if applicable.

Designed to enhance crop vigor, root development, and tolerance to stress.

Weekly Foliar: Apply **Percplus (Plant Power)** @ 16 ounces, **Zinc Plus** @ 8 ounces, and **Boron Plus** @ 4 ounces on 7 to 10 day intervals, until initiation of bulking.

Design is to maintain crop development, vigor, and reduce stress, while maintaining nutrient balance during critical phase of development.

Initial Bulking: (May be applied with insecticide) 32 ounces per acre of **Nutri-K** applied with 16 ounces of **Calcium Plus**, 8 ounces of **Percplus (Plant Power)**, and 4 ounces of **Boron Plus**. (Two to three applications)

Mixing: Always dilute **Nutri K** in water first, and follow with other ingredients in listed order to avoid excessive foaming.

Designed to enhance bulking, uniformity, and maturity.

NOTE: *These guidelines may be altered based on type carrots planted.*

These **DeltAg Guidelines** have been utilized to enhance overall crop performance and are not intended to be utilized as a replacement for basic and customary fertilizer applications.
