

# Defoliation Studies

University of Arkansas  
Clarkdale AR, 2000

Procedure: A tank mix of *Def* at 1 to 8 and *Drop* at 1 to 32 in a ten gallon volume was applied at 65% Open Boll on September 14, 2000. The *DeltAg* products were added to this same tank mix for defoliation enhancement effects and evaluated based on observations only.

Weather Conditions: Sunny, 92 F. and 80% Humidity.

This test was designed with standard replications and for observations only.  
No yield data was taken.
